## Work History

2018-06 -

Current

### Full Stack Developer

*ABCS Safety Training Inc, Edmonton, Alberta*

- Maintained a complex online LMS( learning management system) application prosperlms.com, and collaborated with team members to implement new features.
- Being an expert from MySQL, PHP, and Node.js on the backend to HTML, CSS, and Vue.js on the frontend.
- Introduced Vue.js to our team and led the team to reconstruct the application at an early stage by separating frontend and backend, which increased the maintainability and extensibility of the application.
- Designed and implemented most of the basic frontend components and built a high usability backend framework from native PHP, which improved the productivity of the whole team.

## Education
